I need help, i recently modded my save in game so that i have 50,000,000 gold and 2000 guild seals... when i found that any of my saves after that don't work. it will say saving. but then the load wont show up. its so frustrating, and the mods worked so why is this broken?
Please i dont wanna go through the whole beginning again.

Honestly, I don't know what to tell you. It's quite obvious that you didn't backup your saves first, so replacing the files with those is out...

Right. As a game, Microsoft and Lionhead did a lot to prevent tampering with their files. From what I remember there's multiple checks against modifying saves. And it's possible to break a save by giving yourself too much money or seals.
