I was wondering, is it possible to somehow turn off all the blood, gore, and splatter during combat?

It might be possible to replace the blood textures with alpha, but I doubt you can do much beyond that.

probably...

every weapon has 'DrawsBlood' component

it's is boolean value

there three TRUE value in globals.gdb, so you may try to change them to FALSE (0)

this is from latest DLC

```
T# 0000000D HO 00280100 HV E1DBBC56 DTO 00280144 DT 0000 DO 0000E5C4 D
00000001 DrawsBlood
```

Thank you very much! Now all I have to do is learn how to do that. I'll post back if that works or not when I figure it out, in case anyone else wants to turn theirs off too.

You will need a GDB editor if you want to easily make that change. It should be in the ./globals/global.gdb I think.

As soon as I get a chance I'll put up the GDB tools into the tools forum.

It doesn't work actually...

It doesn't see some offsets, I forget to tell you about this bug

this is offsets for 'DrawsBlood'

#0649B35E

#92078C76

#DB0E8B1F

The easiest way is to open global.gdb in the HEX-editor and go to offset: 0000E5C4 and change 1 to 0, then do the same on 00147C68 and 001E87FC offsets
