Subject: Game crashes after following script activation Posted by cjchris on Mon, 17 Mar 2014 15:21:37 GMT View Forum Message <> Reply to Message

Hi, followed the tutorial to activate scripts and add items etc. However the game crashes after the save game loading screen. I bought the entire pack on steam a while ago with all the dlc. I'm not sure if I'm supposed to add a line to the banks to direct it towards the scripts folder instead of gamescripts_r.bnk.

Any help would be appreciated.
