Hello!

I have never modded a game in my life, so reading this forum is hard, there is not so much information for such inexperienced user like me, so I need some help, please.

For a long time I was trying to get my hands on loading screens posters, like this ones
[imgur\[dot\]com/a/jC2ld#9](http://imgur[dot]com/a/jC2ld#9)

Could please someone help to me extract them from the game, if this is even possible? I think BlackDemon's BNK Utils is related, thought I tried A LOT and couldn't extract anything from the game.

Please, help me to get these posters

they should be in
art\gui\gui_textures.bnk.dat
or
globals\globals_textures.bnk.dat
first you need to extract .bnk files from streaming.bnk
then place .bnk in .dat files folder
then you can open it with BlackDemon's BNK Utils
after you find posters, probably you need to convert them to DDS format with this tool

Did you ever find anything? I've always wondered why, after you become Queen (/King), it still shows posters of Logan! I think it would be cool to make some "For Queen and Country" posters (or something) to put up there, instead...
