Is there a way to remove a weapon from the armory/inventory? Using cheats I got the Bloodstone Bludgeon and Gusket's Musket twice. I can't sell them because they don't show up in the pawnbroker.

```
if Inventory.GetNumberOfItemsOfType(GetLocalHero(), 'ITEM_NAME') > 1 then
  Inventory.RemoveItemOfType(GetLocalHero(), 'ITEM_NAME')
end
```

It worked. I didn't think it was as easy as altering `Inventory.AddItemOfType(GetLocalHero(), 'ITEM_NAME')` to `Inventory.RemoveItemOfType(GetLocalHero(), 'ITEM_NAME')` Thanks so much!

Ok I have been trying,

```
if Inventory.GetNumberOfItemsOfType(GetLocalHero(),
'ObjectInventoryLegendarySwordBaronSlayer') > 1 then
Inventory.RemoveItemOfType(GetLocalHero(), 'ObjectInventoryLegendarySwordBaronSlayer')
return nil
end
```

for Hours and will continue to try but if someone could help me, I would greatly appreciate i

why you need
return nil
???

Thanks for the reply, I'm new at this but still doesn't work. I don't know why but the only things that seem to work are the debug commands

I was putting it in the wrong order. I added all the weapons and removed the ones that you get from playing through, also limited edition weapons

```
ScriptActivation[ScriptCode.QU000].AbleToRun=function ()  
Debug.GiveAllMeleeWeapons()  
Inventory.RemoveItemOfType(GetLocalHero(), 'ObjectInventoryLegendarySwordInquisitor')  
Inventory.RemoveItemOfType(GetLocalHero(), 'ObjectInventoryLegendarySwordChanneler')  
Inventory.RemoveItemOfType(GetLocalHero(), 'ObjectInventoryLegendarySwordShardborne')  
Inventory.RemoveItemOfType(GetLocalHero(), 'ObjectInventoryLegendarySwordBaronSlayer')  
Inventory.RemoveItemOfType(GetLocalHero(), 'ObjectInventoryLegendarySwordWolfsbane')  
Inventory.RemoveItemOfType(GetLocalHero(), 'ObjectInventoryLegendaryHammerChampion')  
Inventory.RemoveItemOfType(GetLocalHero(), 'ObjectInventoryLegendaryHammerAbsolver')  
Debug.GiveAllRangedWeapons()  
Inventory.RemoveItemOfType(GetLocalHero(), 'ObjectInventoryLegendaryPistolGnomewrecker')  
Debug.AddAllClothing()  
Debug.AddAllClothingF2()  
Debug.AddAllClothingAccessories()  
Debug.AddAllHairstyles()  
Debug.AddAllClothingSuits()  
return nil  
end
```

with this way of modding (ScriptActivation.lua) your can easily broke all your quests probably Debug.GiveAllRangedWeapons() already broke it and next line: Inventory.RemoveItemOfType don't even execute, as all that below

Thats the only way I can get it to work, what would you suggest? Any input is most welcomed.

```
remove all Debug commands
also add msgbox for debugging
like this to the end of script
GUI.DisplayMessageBox("ScriptActivation.lua successfully loaded!")
while (GUI.IsDisplayBoxActive()) do
  coroutine.yield()
end
so, if msgbox appears when game is loaded, then all ok
if not, then something wrong
```
