Is there a way of doing that with scripts?

```
if not Layers.IsLayerActive("QD030_MistpeakValleyDemonDoorTransition") then
  QuestTracker.SetAsCompleted(GetLocalHero(), "QD030_MistpeakValleyDemonDoor")
  Layers.ActivateLayer("QD030_MistpeakValleyDemonDoorTransition")
end
```

Haha, it worked although the door still talks to me. But even the achievement counter changed. You're awesome, thanks!

I'm entirely new to modding this game.

I have the two DLCs and unpacked DLC2Free. Just which file (and where in it) does this go into?

I'm using LuaEdit if that helps.

```
if not Layers.IsLayerActive("QD030_MistpeakValleyDemonDoorTransition") then
  QuestTracker.SetAsCompleted(GetLocalHero(), "QD030_MistpeakValleyDemonDoor")
  Layers.ActivateLayer("QD030_MistpeakValleyDemonDoorTransition")
end
```

If someone could tell me where to slot this, I'd be VERY grateful.

Really, they need to stop doing these "online-only" things. They're a plague.

You shame me, good sir. And rightly, I must anon and utilise this mentally-stabilising tonic. Wow, what a pile of donkey gonads.
Thanks, Arto. I wasn't sure if this forum was still active or not

Or, once again, it's simple enough to inject that script into scriptactivation.lua as described in
ZackTiro's Script Modding Setup Tutorial

That's what I did, and it worked fine for me (although as others mentioned, the door is still shut and talks to me, but I can walk through).

modding with scriptactivation.lua script is very dangerous, you can easily break your save games but you can add to the end of script, msgbox with some text to know for sure that it is loaded correctly
