I started playing Fable 3 around the time that Fable Anniversary Came out and I have managed to find and download most of the DLC files for Fable 3 but the big trick which I have found very hard to accomplish is putting all the DLC files in the right directory's and getting to Xlive/Xliveless Emulator to work and enable the DLC files. Could Anyone give me a detailed tutorial on how to do this.

Downloadable Content I Have:

-----

- Traitors Keep
- Understone Quest Pack
- Dog Breed Set
- Dog Outfit
- Industrial Knight Outfit
- Highlander Tattoo Set
- Yule Hat (Santa Hat)
- Dye Pack
- Hair Pack

-----

There is also a desktop Screenshot of the folders with the dlc files in them .
