This mod will replace xlive requirements for weapons update with local equivalent  
also it replace update result if it affect on multiplayer game only

it's only affect on new weapons, so you will need to BUY WEAPONS AGAIN if you have it already  
It ONLY for Traitor's Keep DLC!  
It replace globals.gdb so is not compatible with other mods that replace it

Setup:  
use Catspaw's GFWL emu  
put DLC folder to Fable 3 game directory

offsets for manually modding  
globals.gdb

Thanks for this, but I've run into a problem.

It's started spewing out Weapons with blank fields for names and the Descriptions are like so:

INV\_ITEM\_WEAPON\_WHALE\_DESC  
INV\_ITEM\_WEAPON\_DONOR\_DESC  
INV\_ITEM\_WEAPON\_THUNDARAGA\_DESC

I'm sure I'm using Catspaw's GFWL Emu.

I have all the DLC installed in the DLC folder.

This is my Fable 3\DLC folder currently:

10\_ScriptInjector  
11\_xlive\_weapons\_updates\_remove  
Inquisitor\_Pack  
Traitor's\_Keep  
Understone\_Quest\_+\_Free\_DLC

Everything but the 11\_xlive\_weapons\_updates\_remove is working properly. Any ideas?

Traitor's Keep is working?

squark wrote on Wed, 07 June 2017 23:24

Inquisitor\_Pack  
Traitor's\_Keep  
Understone\_Quest\_+\_Free\_DLC  
anyway, try to rename this to  
01\_InquisitorPack  
02\_Understone  
03\_TraitorsKeep

I tried that and... same error.

It's a bit weird.

I might have to find somewhere to download the Golf Weapons pack (thought I already had that) but I really don't want to create an account on a forum just for that.

It's a bit weird. did you buy weapon again?

remember it's only affects on new items

Golf Weapons pack? What kind of weapons are there? It's probably already in game, you just only need to add them to your inventory by scripts.

Well... I've never seen any of them in any of the shops.

The Golf Weapons pack (Thundaraga, Hammer of the Whale and Donna's Kebab) was a reward for the Fable Coin Golf thing that was only available of Windows phones IIRC.

So... I guess it's already in the script files though I've already tried to add them via scripting, but they don't show up even though the rest of them do.

```
local mostLegendaries = {  
  'ObjectInventoryLegendaryHammerFaerie', <- this shows up fine  
  ...  
  'ObjectInventoryLegendaryHammerHammerOfTheWhale', <- this doesn't  
  'ObjectInventoryLegendarySwordDonorKebab', <- this doesn't either  
  'ObjectInventoryLegendarySwordThundaraga', <- nor does this  
  ...  
}
```

```
for key,value in pairs(mostLegendaries) do  
  if Inventory.GetNumberOfItemsOfType(GetLocalHero(), value) == 0 then  
    Inventory.AddItemOfType(GetLocalHero(), value)  
    GUI.DisplayReceivedItem(value)  
  end  
end
```

```
for key,value in pairs(mostLegendaries) do  
  if Inventory.GetNumberOfItemsOfType(GetLocalHero(), value) > 1 then  
    Inventory.RemoveItemOfType(GetLocalHero(), value)  
  end  
end
```

I'll see if any of the shops have them for sale. Brightwall's blacksmith is a big pile of nope. I'm guessing neither Bowerstone nor Aurora's selling any of them.

Damn...

It's not just a coincidence  
something completely fucked up  
did you try new game with right DLC order?
