I have no problems with scripts for doing things such as opening the Mistpeak Demon Door and for adding in Legendary weapons. However, I've ran into a problem with scripting for furniture. What I want to do is start the character off with some high end furniture to add into the homes, to jump start the economy of Brightwall early in the game. That would cut down on the ridiculous grinding (purchasing of goods over and over, redecorating homes with progressively better furniture over and over, etc), until the higher end furniture starts to appear in the furniture store(s). The furniture names look like this....

```
DoubleBedLevel5  
BedsideTableLevel5  
ComfyChairLevel5
```

As you can see, the names are not prefixed with the usual "ObjectInventory....." in the naming. I was actually expecting to see something like "ObjectInventoryFurniture...", but that's not the case here.

So, Here is the script I setup (as a quick test) and it failed to work....

```
local fillFurnitureItems = {  
  'DoubleBedLevel5',  
  'BedsideTableLevel5',  
  'ComfyChairLevel5',  
  'DeskTableLevel5',  
}  
for key,value in pairs(fillFurnitureItems) do  
  while ((Inventory.GetNumberOfItemsOfType(GetLocalHero(), value)) < 5)  
  do  
    Inventory.AddItemOfType(GetLocalHero(), value)  
  end  
end
```

If anybody has any suggestions, I'd appreciate it.

probably they don't have scripts names, so..
this is not working?
ScriptFunction.SetWealthValueForAllVillagesOnLevel(100)
it should boost economy to max for all towns

```
ScriptFunction.SetWealthValueForAllVillagesOnLevel(100)
```

it should boost economy to max for all towns

During the time delay for my question to be approved by the moderator, I was able to make furniture items add in. All I did was change to a script that added each item one at time (another script example I had seen on this site). I just gave myself 100's of every luxury item, all rugs and collectible paintings.

This is a small portion of my script...

```
while ((Inventory.GetNumberOfItemsOfType(GetLocalHero(), 'BedsideTableLevel5')) < 200)
do
Inventory.AddItemOfType(GetLocalHero(), 'BedsideTableLevel5')
end
while ((Inventory.GetNumberOfItemsOfType(GetLocalHero(), 'BookcaseLevel5')) < 200)
do
Inventory.AddItemOfType(GetLocalHero(), 'BookcaseLevel5')
end
while ((Inventory.GetNumberOfItemsOfType(GetLocalHero(), 'ChildBedLevel5')) < 200)
do
Inventory.AddItemOfType(GetLocalHero(), 'ChildBedLevel5')
end
while ((Inventory.GetNumberOfItemsOfType(GetLocalHero(), 'ClosetLevel5')) < 200)
do
Inventory.AddItemOfType(GetLocalHero(), 'ClosetLevel5')
end
while ((Inventory.GetNumberOfItemsOfType(GetLocalHero(), 'ComfyChairLevel5')) < 400)
do
Inventory.AddItemOfType(GetLocalHero(), 'ComfyChairLevel5')
end
....
....
....
```

So, I would go into town, buy goods from everyone, then upgrade all homes to have luxury items. Leaving the rent prices at "Normal", the furniture upgrades were yielding 2x-4x the rent at times. This is good when you are playing a good character and don't wish to upset the villagers with higher rents, in order to have more money for the end game.

During a playthru with all homes using luxury furniture, I didn't really keep up with going into each town and buying goods to keep the economy maintained. I repaired all homes whenever the Sanctuary map indicated something needed repair. So, at the point I became "King" and went to spot check homes in various towns, quite a bit of furniture was downgraded to either "Decorative" or "Average", while some remained all "Luxury". Really, at this point, it no longer mattered as I had amassed plenty of gold from the initial luxury upgrade to everything.

But, I think I'll try your suggestion to force the village wealth. Since their wealth is dynamic in the game, I think I'll have to figure out how to make the other scripting method work (the one that would repeat every xx seconds). Currently, I simply use a modified DLCfree.bnk that I temporarily replace in "Traitors" keep DLC folder.

EDIT: I have the script injector working now. Added in ScriptFunction.SetWealthValueForAllVillagesOnLevel(100) and vendors are saying things like "sure the prices are high, but you're the richest you've ever been". Also, the furniture available in the store upgraded to mostly luxury, and a couple homes changed from worn to luxury furniture all on their own, after a few game days.

Ya, I can probably turn that off. It was originally on because there were more bot posts than actual posts.

For those who are looking for all of the luxury furniture names here it is:

BedsideTableLevel5
BookcaseLevel5
ChildBedLevel5
ClosetLevel5
ComfyChairLevel5
DoubleBedLevel5
LightFixingLevel5
DeskTableLevel5
TableLevel5
CupboardLevel5
DresserLevel5
DrawersLevel5
SinkLevel3
StoveLevel3

Hope that helps, and as for the rugs i have no idea yet.
