I'm stuck on the quest kidnapped, she is stuck on the island. my idea was to delete the part of the script that makes you let go of her hand while swimming, but I have no clue how to go about it. can someone please tell me what file it would be in?

I somehow make AI swim by adding proper animation and SwimmingComponent to them, but they don't swim probably because there is no NavMesh in water, so AI don't know where to go... anyway.. HOW SHE GET TO THE ISLAND!? O_O
who is kidnapper here?

it's easy to fix by scripts by just teleport her to you from the island
but you need to know her ID

Physics.TeleportToPosition(SHE_ID, CVector3(x, y, z))

Physics.TeleportToPosition(SHE_ID, QuestManager.HeroEntity:GetPosition())
