Is there a way to edit a lua file to make the shops alternate their stock? that way I can buy them in a legit way lol I think that best way would be by editing the shopgroupmind.lua, but no clue how and nobody seems to have brought it up

you can't edit any lua scripts before decompiling them right
and about alternate stocks, they are constant, you can change them only by edit .gdb files (some stocks in level gdb, some in globals)
