Need a modder to figure out how to get DLC to work with a legit copy of Fable 3 on Steam & the GFWL fix (allows us to play online).

The steps we take is in my guide, but the problem is DLC doesn't work with the online mode and there's no way to buy the DLC legitimately. Xbox & Microsoft Support doesn't seem to mind if we create a fix ourselves until (hopefully) Xbox / Microsoft release the DLC for purchase again for PC users.

If ANY modder of ANY skill level can assist in making this work that would be great. It's just unfortunate that atm we have: No Online but DLC OR Online but no DLC.
