I want to alter the face of the princess, maybe even replace/add some hairstyles to the game (I planned on converting Sims 4 Maxis Match hairs since they look similar enough to Fable's clay hairs), make the body slimmer and add my own outfits (that part probably won't happen for a while).

I downloaded the BNK Utils .zip file from here and have Blender, GIMP and Fable 3, of course but I don't know where to start with doing this type of thing or if it's even possible to export the princess to alter her then import back into Fable to play as.
