Hey, I have a problem with the weapons from the shooting range and the Reaver's Wheel thing, I had used that one items unlocker that unlocks everything, used it after defeating Saker and after I complete the Masquerade quest and play those two places I mentioned on the start, im left with twice of the 4 weapons. So if anyone has a lua script or something, i would apreciate it.

Edit 2: Forgot to mention the Wolfsbane being duplicated too lol.

PD: Sorry for bad english

Edit:Also, how I can make the "Hobnobbing with Hobbes" quest appear earlier rather than after completing the base game?

I'm going to assume you know how to get the game to load mod scripts already.

Here's the code to remove an item:

```
if Inventory.GetNumberOfItemsOfType(QuestManager.HeroEntity, 'x') > 0 then
    Inventory.RemoveItemOfType(QuestManager.HeroEntity, 'x')
end
```

Just replace x with anything from the list that you want to remove and the 0 with however many you want removed.

The list of weapons:

```
'ObjectInventoryLegendaryHammerAbsolver',
'ObjectInventoryLegendaryHammerAnwarGlory',
'ObjectInventoryLegendaryHammerAuroraShield',
'ObjectInventoryLegendaryHammerChampion',
'ObjectInventoryLegendaryHammerDragonboneHammer',
'ObjectInventoryLegendaryHammerFaerie',
'ObjectInventoryLegendaryHammerHammerOfTheWhale',
'ObjectInventoryLegendaryHammerJackHammer',
'ObjectInventoryLegendaryHammerLunariumPounder',
'ObjectInventoryLegendaryHammerMalletsMallet',
'ObjectInventoryLegendaryHammerScytheHammer',
'ObjectInventoryLegendaryHammerSorrowsFist',
'ObjectInventoryLegendaryHammerTenderiser',
'ObjectInventoryLegendaryHammerTrollblight',
'ObjectInventoryLegendaryHammerTwatter',
'ObjectInventoryLegendaryHammerWillmageddon',
'ObjectInventoryLegendaryPistolBarnumificator',
'ObjectInventoryLegendaryPistolBloodcraver',
'ObjectInventoryLegendaryPistolBriarsBlaster',
```

```
'ObjectInventoryLegendaryPistolChickenbane',
'ObjectInventoryLegendaryPistolDesertFury',
'ObjectInventoryLegendaryPistolDragonstomper',
'ObjectInventoryLegendaryPistolFullMonty',
'ObjectInventoryLegendaryPistolGnomewrecker',
'ObjectInventoryLegendaryPistolHolyVengeance',
'ObjectInventoryLegendaryPistolIceMaiden',
'ObjectInventoryLegendaryPistolMiriansMutilator',
'ObjectInventoryLegendaryPistolPerforator',
'ObjectInventoryLegendaryPistolSailorGeriShooter',
'ObjectInventoryLegendaryRifleArkwrightFlintlock',
'ObjectInventoryLegendaryRifleDefender',
'ObjectInventoryLegendaryRifleEqualiser',
'ObjectInventoryLegendaryRifleEthelbertBoner',
'ObjectInventoryLegendaryRifleFacemelter',
'ObjectInventoryLegendaryRifleHeroCompanion',
'ObjectInventoryLegendaryRifleMarksman',
'ObjectInventoryLegendaryRifleMolynator',
'ObjectInventoryLegendaryRifleSakerFlintlock',
'ObjectInventoryLegendaryRifleScattershot',
'ObjectInventoryLegendaryRifleSimmonsShotgun',
'ObjectInventoryLegendaryRifleSkormJustice',
'ObjectInventoryLegendaryRifleSwiftIrregular',
'ObjectInventoryLegendarySwordAvoLamentation',
'ObjectInventoryLegendarySwordBeadleCutlass',
'ObjectInventoryLegendarySwordCasanova',
'ObjectInventoryLegendarySwordChanneler',
'ObjectInventoryLegendarySwordDonorKebab',
'ObjectInventoryLegendarySwordFishknife',
'ObjectInventoryLegendarySwordInquisitor',
'ObjectInventoryLegendarySwordMerchantsBodyguard',
'ObjectInventoryLegendarySwordMogoShafter',
'ObjectInventoryLegendarySwordMrStabby',
'ObjectInventoryLegendarySwordPorkSword',
'ObjectInventoryLegendarySwordShardborne',
'ObjectInventoryLegendarySwordSlimquick',
'ObjectInventoryLegendarySwordSouldrinker',
'ObjectInventoryLegendarySwordSwingingSword',
    'ObjectInventoryLegendarySwordWolfsbane',
'ObjectInventoryLegendarySwordThundaraga',
'ObjectInventoryLegendarySwordThunderblade'
```

So, it should look something like this:

```
if Inventory.GetNumberOfItemsOfType(QuestManager.HeroEntity,
'ObjectInventoryLegendarySwordWolfsbane') > 1 then
    Inventory.RemoveItemOfType(QuestManager.HeroEntity,
'ObjectInventoryLegendarySwordWolfsbane')
```

end

This will remove one Wolfsbane from your weapons. At least, it SHOULD.

Or you could be cheeky and try this out:

```
local wolfsbane = {  
    'ObjectInventoryLegendarySwordWolfsbane'  
}  
  
for key,value in pairs(wolfsbane) do  
    if Inventory.GetNumberOfItemsOfType(GetLocalHero(), value) == 0 then  
        Inventory.RemoveItemOfType(GetLocalHero(), value)  
    end  
end
```

Once you figure out what the names of your other duplicated weapons are, a slight alteration will work fine.
