Hi there, everyone. I apologize if this is the wrong space for this, but this seemed like the most logical place.

I've been a long time fan of Fable games, and have bought every copy of Fable over the years, even getting Xbox Game Pass just for the opportunity to play Fable 2. My issue now is getting working versions of the Fable 3 DLC. I've played them before, but am on a new computer, and there's no way to get them, paying or not. I've reached out to Steam and Microsoft for help, but they weren't able to assist.

TLDR: Does anyone have the files for the DLC. I would be forever indebted to you, as I am to the community, for the great content you guys put out.

I've already tried that forum, along with about a dozen others. If you'd opened any of the links, you'd notice that the DLC links are dead. The others will download, but not the DLC.

My guide has never been dead (it's existed since September 17th, 2020) so I don't know what you're talking about. It also credits quite a few individuals from this forum.
