I've been following the tutorials on this site and they have been great although I'm unable to find these files: dir.mainfest, startup.vsconfig . I was able to find Gamescripts_r.bnk easily and use the extract tool but have no idea where the other 2 are located?

I tried checking the xlive dlc folder but had no luck.

I'm guessing I have missed a step somewhere.

Dude, they're right in the main data folder. Default directory: C:\Program Files\Microsoft Games\Fable III\data

Seriously, not that hard to find. =/

seems like I was searching startup.vsconfig which was how it was spelt on here instead of startup.vfsconfig.

I guess that's what I get for being lazy and using the search filter instead of looking for it myself
